

"CIMAC is unique. Where else can you sit down with engine users, OEMs, component suppliers and researchers and chat informally about our industry?"

"Being able to regularly talk to people from all corners of the engine industry has been an encouragement to me throughout my career."

"Participation in CIMAC activities, social as well as technical, has always given me personal and professional satisfaction."

"CIMAC is the forum for exchanging ideas and learning about what's new in our business."

"CIMAC working groups provide valuable guidelines for engine builders, customers and classifications societies. Technical regulations passed by its commissions are internationally accepted as binding standards."

Each of these personal views captures something of the spirit of CIMAC: a desire to share know-how and find solutions to the technical and commercial problems that affect our industry.

If you're ready to share in order to benefit, contact our central secretariat today.

**the know-how
become part of it**

There's no better way to become acquainted with CIMAC than through our members' own eyes. Here's what some of them have had to say:

CIMAC stands for the International Council on Combustion Engines. Founded in 1951, it aims at strengthening the internal combustion engine business by bringing together diesel engine and gas turbine manufacturers, shipowners, power plant and rail operators, suppliers, oil companies, researchers and classification companies under one banner, to share views and discuss issues concerning our industry.

Working groups proposed by CIMAC members draft internationally acknowledged guidelines for the worldwide engine industry.

CIMAC congresses, organized by CIMAC members, provide a technical forum at which members can meet customers and friends from the global engine community.

By participating in CIMAC's activities you not only contribute to the success of our industry, but also broaden your personal and professional outlook.

Who we are and how we are organized

CIMAC policy is formulated by the CIMAC council, which comprises the Executive Board, National Members Associations and Corporate Members. Working Groups prepare guidelines on topics of interest to the worldwide engine community.

As a member of CIMAC, you help decide what we do and how we do it. For example:

Our activities

CIMAC events are held at important trade fairs to maintain the momentum of industry-related discussion between congresses.

CIMAC publications (recommendations and technical papers) are issued and made available on an Internet database to CIMAC members.

CIMAC is a worldwide non-profit association consisting of National Member Associations, National Member Groups and Corporate Members in 20 countries in America, Asia and Europe.
