Maintenance and repairs - Life cycle support systems

Preventive maintenance to improve availability and to ensure a reliable, economic, and safe operation of the engines and systems under low emissions is a key issue in ships operation. Manufacturers and system suppliers are developing the products and introducing new technologies to extend time between maintenance operations, or to reduce the need for maintenance and repair. Developments of tools within the field of diagnostics, maintenance planning and management systems, and training of operators are important elements to improve the availability of engines. The focus is on "availability" and the latest development for lifecycle support systems.

This CIMAC panel session is dedicated to covering all crucial aspects of the marine engine industry and will provide a superb platform for discussion, decision and announcements of excellence and partnership that the whole repair and maintenance community recognises. Outstanding panelists from the engine manufacturer, supplier and user side will give their presentations, however most of the time will be dedicated to a discussion with the audience. Don't miss it and get your questions answered!

in cooperation with

- Panelists:**
1. Tage Blomberg, Wärtsilä Corporation, Finland (chair)
 2. Mahmoud Abdullah, Kuwait Oil Tanker Company, Kuwait
 3. Axel Kettmann, ABB Turbocharging Worldwide Service, Switzerland
 4. Jamal Mayahi, National Iranian Tanker Co., Iran
 5. Nick Topham, Reederei Blue Star, Germany
 6. Otto Winkel, MAN Diesel A/S, Denmark

On behalf of CIMAC we cordially invite you to the

CIMAC CIRCLE 2006

on Wednesday, 6th December 2006, 10:00 h
at SMEM 2006 Dubai, Sheikh Rashid Hall, Presentation Theatre
Free Admission after Registration at CIMAC Central Secretariat

Matti Kleimola
President

Markus Heseding
Secretary General

Pre-Registration form

(please fill in and send to the CIMAC Central Secretariat by November 17th, 2006)

I would like to participate in the CIMAC CIRCLE on December 6, 2006, in Dubai
