

Working Group

FUELS

WG 7

Who we are

- Engine manufacturers
- Ship owners
- Fuel suppliers
- Fuel analysis institutes
- Fuel additive suppliers

What we do

Prepare recommendations for:

- Low sulphur fuel quality and operation
- Combustion properties
- Fuel grade rationalisation
- Bio fuel considerations
- Track fuel quality worldwide
- Investigate precautions necessary in order to use fuel in different compositions

Who we work with

- We are a Working Group of experienced specialists in the field of marine fuels, representing the major players, and our goal is to prepare recommendations and make tools for the industry on operation on different fuel oils as well as choosing fuel oils that will ensure the safe operation of diesel engines
- Support the ISO 8217 Fuel Standard Group
- Coordination with sister WG in CIMAC such as users, Lube Oil and Emissions

Meeting activities

- Working on: Fuel recommendations and fuel applications in three sub-groups
- Presentations and discussions by group members and external guest speakers

Ongoing subjects

Latest papers:

- Recommendation No. 21 "Recommendations regarding Fuel Quality for Diesel Engines"
- Recommendation No. 25 "Recommendations concerning the design of heavy fuel treatment plants for diesel engines"
