

Working Group

GAS ENGINES

WG 17

Who we are

- Gas engine manufacturers
- Research and consulting organisations
- Component suppliers
- Classification Societies
- Oil companies
- Universities

What we do

We deal with all aspects of gas engine technology, with discussion of important topics of general interest, in particular:

- Exhaust emissions
- Performance definitions
- Application and safety issues
- Gas quality issues

Who we work with

- OEMs and their suppliers
- Certification authorities
- Engineering companies and end users

Meeting activities

Meetings are held 2 – 3 times per year, separately or in connection with appropriate events

Ongoing subjects

- Position paper on the relationship between NO_x and CO₂ emissions
- Position paper regarding unburnt hydrocarbon and formaldehyde emissions from gas engines
- Information about the transient response capabilities of gas engines
