

Press Release

February 2006

Call for papers

25th CIMAC CONGRESS May 21 – 24, 2007

in Vienna, Austria

words: 259
characters:1,802

The preparations for the forthcoming 25th CIMAC Congress 2007 in Vienna, Austria, are progressing well. Widely recognized as the most technically acclaimed event in the field of ship propulsion, power generation and rail traction, the CIMAC Congress 2007 focuses on all aspects of energy conversion and engine operation including product configuration, performance improvement and environmental protection.

CIMAC announces its Call for Papers! The technical areas covered are categorized in 14 CIMAC sessions on diesel engines, gas engines and gas turbines:

- Product Development, Fundamental Engineering – Piston Engines, Environment, Fuel & Combustion, Tribology, Component & Maintenance Technology and System Integration of **Diesel Engines**
- Product Development and Component & Maintenance Technology of **Gas Engines**
- Turbochargers
- Product Development & Fundamental Engineering, Environment, Fuel & Combustion, of **Gas Turbines**
- Integrated Systems – **Piston Engines** and **Gas Turbines**
- Users' Aspects – Marine Applications and Land-based Applications (Power Generation, CHP, Oil & Gas, Rail etc.)

CIMAC welcomes the submission of **abstracts between March 1st and May 1st, 2006**. All abstracts shall incorporate new information not previously published and have to be submitted electronically via the CIMAC webpage. A link to this webpage will be available **from March 1st** at http://www.cimac.com/congress_2007.htm

On behalf of the Austrian Congress Organising Committee CIMAC is looking forward to receiving a large no. of interesting abstracts.

Hanspeter Zingg
