

Congress Site Vienna

Vienna has established an outstanding reputation as conference city. International statistics confirm year after year that Vienna ranks among the Top Five congress destinations of the world.

Hofburg Congress Center Vienna

As one of Europe's first addresses, the Hofburg Congress Center Vienna occupies a unique position among the congress centers of the world. The glittering state rooms of the Imperial Palace, the former winter residence of the Habsburgs, have maintained their original character and today – fitted with modern technical equipment – provide an impressive backdrop for very special events – such as the 25th CIMAC World Congress on Combustion Engine Technology.

25th CIMAC World Congress on Combustion Engine Technology

I am interested in the Vienna CIMAC Congress

- Please keep me informed
- I would like to present a paper
- I would like to exhibit

Ship Propulsion Power Generation Rail Traction

May, 21-24, 2007
Vienna - Austria

INVITATION

CIMAC Invites the Engine World

The Austrian National CIMAC Committee has the pleasure to invite you to the 25th CIMAC World Congress on Combustion Engines to be held in Vienna on 21-24 May 2007.

Wiener Tourismusverband

STG

CIMAC

The CIMAC Congress is one of the most important international events in the field of diesel and gas engines as well as gas turbines.

A traditional value of the CIMAC Congress is the high technical level of the sessions. This has been complemented over the past years by an intensive dialogue with users and the associated industry.

Strong international competition and stringent emission legislation result in an increasing sophistication of the power systems while still the pressure is on for higher economy, reliability and easier maintenance. The continuing change in the industry has brought varying degrees of environmental, safety, product liability and market constraints to each company and to each country. Many of these can be prevented, reduced or even eliminated by concentrated global communication.

The 25th CIMAC Congress in Vienna, Austria is organized to create this forum for users, such as ship-owners, power station and rail operators, suppliers, oil companies, scientists and classification societies to meet with the manufacturers for an intensified dialogue and for a better mutual understanding.

Congress Activities

This 4-day Congress will offer state-of-the-art reports on engine technology and engine applications by experts. Ladies' programs and other social events will help to renew personal contacts. On the fifth day technical visits are scheduled.

Technical Program

This offers the best opportunity to listen to more than 150 papers that deal with current and future topics related to piston engines and gas turbine development, design, operation and especially user aspects.

Exhibition

The Congress will be accompanied by an exhibition which offers companies and institutions an excellent opportunity to present their products and technologies.

Technical Visits

On the day after the Congress attractive factory tours will be arranged.

Social Events

An official reception, a gala dinner and traditional company receptions in the evenings are scheduled. Accompanying persons will find a wide choice of programs during the session hours.
