

Congress Site Shanghai

Shanghai is not only the largest city in China, but also one of the world's famous economic, financial, trade and shipping centers. Shanghai earns a reputation for its long history and rich culture. Facing the Pacific Ocean and connecting the inland, Shanghai has become a unique city showing both oriental and western spirit due to its advantageous geographic

location. So far the city has well preserved a number of relic sites dating back to the Tang Dynasty more than 1,000 years ago. Meanwhile Shanghai has the world's third and sixth highest buildings, World Financial Center and Jin Mao Tower. It is a modern and fashionable city stepping with the world.

Shanghai Exhibition Center

The Congress will take place in the Shanghai Exhibition Center, 1000 Yanan Road (M) in Shanghai, China, located in the center of the city, near the famous Nanjing Road.

Congress 13

Shanghai

27th CIMAC World Congress on Combustion Engine Technology for

Ship propulsion
Power generation
Rail traction

May 13th-16th, 2013
Shanghai

INVITATION

CIMAC Invites the Engine World

The Chinese National CIMAC Committee has the pleasure of inviting you to the 27th CIMAC World Congress on Combustion Engines to be held in Shanghai, China, from 13th–16th May 2013.

The CIMAC Congress is one of the most important international events in the field of large diesel and gas engines, covering also turbine applications. A traditional value of the CIMAC Congress is the high technical level of the sessions. This has been complemented over the past years by an intensive dialogue with users and the associated industry.

Stringent exhaust emission legislation and fierce international competition lead to increasing sophisticated power systems while the pressure is still on reliability, higher value for money and easier maintenance. Continuing change in the industry has brought varying degrees of environmental, safety, product liability and market constraints to each company and to each country. Many of these can be improved, prevented, reduced or even eliminated by concentrating on global communication.

Congress 13 Shanghai

The 27th CIMAC Congress in Shanghai, China is organized to create a forum for users, such as ship-owners, power station and rail operators, suppliers, oil companies, scientists and classification societies to meet with the engine manufacturers for an intensified dialogue and for better mutual engine understanding.

Congress Activities

This 4-day Congress will provide state-of-the-art reports on engine technology and engine applications by experts. Programmes for accompanying partners and other social events will help in the renewing of personal contacts.

Technical Programme

This offers the best opportunity to listen to more than 180 papers that deal with current and future topics related to piston engine and gas turbine development, design operation and especially user aspects.

Exhibition

The Congress will be accompanied by an exhibition where companies and institutions can present their technologies and products. Please contact the Secretariat for further information.

Technical Visits

The Congress is followed by visits to local industry on the Friday of the Congress week.

Social Events

An official reception, gala dinner and traditional company receptions are scheduled for the evenings. Accompanying persons will be offered a wide choice of programmes during the session hours.
